

WARREN SCOTT
Senior Consultant
Compliance Services International – Europe

SUMMARY OF EXPERIENCE

PROFESSIONAL EXPERIENCE

Warren Scott is a regulatory consultant at CSI's European office – combining a focus on the chemical, agrochemical and biocide sectors with marketing and office coordination responsibilities. Prior to joining CSI, Warren spent over 15 years in the contract research industry, initially in both scientific and marketing roles with the former Inveresk Research, and later as Coordinator for European Business Development with Wildlife International, Ltd. With a scientific background based in environmental chemistry, Warren has extensive experience in the conduct of radiolabelled environmental fate studies, while his coordination and marketing roles have involved programme management, regulatory support and new business development in various industry sectors. Other marketing activities have included organising participation at many relevant conferences and exhibitions, and the development of publicity materials to support business expansion.

CREDENTIALS

BSc (Hons) 1988, University of Aberdeen – Soil Science

PROJECT EXPERIENCE

- Development and coordination of test programmes for clients within the chemical, agrochemical, biocide, animal health and human pharmaceutical sectors.
- Protocol development for laboratory based GLP environmental fate studies.
